

RTS RECEIVER w/ CONTACT OUTPUTS

Operating Procedures

DESCRIPTION

This RTS radio frequency receiver allows operation of Somfy controls from Telis Transmitters, Chronis Timers or RTS Switches. It is prewired to work any control compatible with IGC switches. It accepts the radio signals and outputs contact closures.

PROGRAMMING PROCEDURE

- Each RTS Receiver can only memorize 3 Transmitters
- 1. Connect the RTS Receiver to the modular connector on the IGC or similar control.
- 2. To memorize the DOWN direction, first press the PR button on the receiver until the red LED lights. Press the DOWN button on the Telis or other RTS Transmitter (for 4 channel devices, select the channel first). The red LED on the RTS receiver will flash then turn off. That transmitter is now memorized
- **3.** To memorize the STOP direction, press the PR button again on the receiver until the LED lights. Press the STOP button on the RTS Transmitter, ensure the same channel as above is selected. The red LED will flash then turn off. Then press the PV button on the receiver until the green LED lights. Press the STOP button on the transmitter again, the green LED will falsh then turn off. The STOP direction is now memorized.
- **4.** To memorize the UP direction, first press the PV button on the RTS receiver until the green LED lights. Press the UP button on the same RTS Transmitter or channel as above. The green LED will flash then turn off, the UP direction is now memorized.
- **5.** To clear all memorized transmitters/directions, press and hold either the PV or PR button for 7 seconds, until the corresponding LED lights. The RTS Receiver will no longer respond to any transmitter commands.
